PROFESSIONAL SUMMARY

BCA graduate with Data Science training and internship project experience in data analysis, visualization, and machine learning. Familiar with Python, SQL, Excel, Power BI, Pandas, NumPy, and Scikit-learn. Experienced in exploratory data analysis, data cleaning, model evaluation, and dashboard development through academic and client projects. Seeking entry-level opportunities in Data Analytics or Data Science.

TECHNICAL SKILLS

Programming: Python, SQL, MySQL
Data Analysis: Pandas, NumPy, Data Cleaning, EDA, Statistics
Visualization: Power BI, Excel, Matplotlib
Machine Learning: Scikit-learn, Classification, Regression, Clustering, Model Evaluation
Tools: Jupyter Notebook, Git, GitHub

INTERNSHIP EXPERIENCE

Data Science Intern – Rubixe AI Solutions *Nov 2025 – Mar 2026*

- Worked on data science capstone projects involving data preparation, exploratory analysis, and machine learning workflows.
- Participated in a client project focused on bank credit risk analysis using MySQL, Python, and Jupyter Notebook.
- Compared Logistic Regression and XGBoost models to evaluate classification performance.

PROJECTS

Bank Credit Risk Analysis – Client Project

- Analyzed credit risk data using MySQL and Python to study factors associated with potentially bad accounts.
- Evaluated classification models and examined threshold-based performance using credit-risk evaluation techniques.

Portuguese Bank Marketing Prediction

- Built machine learning models to predict whether customers would subscribe to a term deposit.
- Evaluated Logistic Regression, Decision Tree, Random Forest, and XGBoost; XGBoost achieved approximately 91.93% accuracy.

Customer Transaction Prediction

- Explored anonymized customer transaction data and compared classification models, considering the imbalanced target variable.

Rice Leaf Disease Detection

- Developed a CNN-based image classification project to distinguish rice leaf disease categories using TensorFlow/Keras.

FIFA 20 Player Analysis

- Prepared and analyzed player data and applied K-Means clustering to explore player groupings.

Blinkit Sales Dashboard

- Created a Power BI dashboard to present sales information and support visual exploration of business performance.

EDUCATION

Bachelor of Computer Applications (BCA)
Karnataka University, Dharwad *Completed July 2025*

TRAINING

Data Science Course – DataMites, Bengaluru
Training in Python, statistics, SQL, Excel, Power BI, data analysis, and machine learning fundamentals.
